This, however, not to include the opening and closing ranges where, as per the rules of the Chicago Board of Trade, brokers are not responsible for execution. If Chicago futures do not trade during that session at US\$ 0.0005 per pound over the limit stipulated by Seller, no price fixing has taken place for that day, unless Buyer advises within 2 hours after the close that part or total of the pricing order given has been priced, and in that case Seller to accept quantity given by Buyer. Seller has the right to change pricing instructions during the session, provided Buyer has not already executed the original instructions by the time the new order reaches the floor. For orders given or changed during the session of the Chicago Board of Trade, however, Buyer not to be responsible for execution. Seller to fix the price latest 5 business days prior shipment, but not later than 2 business days prior to the first notice day of the month serving as basis for the pricing of this contract. C) If the contracted quantity has a tolerance and the contractual Chicago Board of Trade month is already on its delivery period (between the First Notice Day and Last Trading Day) then the final settlement of such over/under fill must be based on the next Chicago Board of Trade month, at par/plus/less the original FOB premium corrected by the Chicago Board of Trade spread established basis the settlement price 2 business days prior first notice day of the contractual Chicago Board of Trade month.	83 84 85 86

a. The ETA of the substituting vessel must be 5 days earlier up to 5 days later than the last reported ETA of the substituted vessel. For substitution purposes, the valid ETA is the last one informed in writing by the Buyer to the Seller.	98 99
b. If condition stated in item "a" above is fulfilled, then obligation date will remain the same of the original nomination. However if earlier than last reported ETA, substitution must reach shipper of the goods latest 3 business days prior to the new vessel's ETA. For laytime purposes, time used to customs clean documents not to count as laytime.	100 101 102

10.GENERAL LOADING CONDITIONS: Captain and crew to collaborate in all quay movements necessary to accommodate shore loading equipment in the respective tanks/spaces. Buyer to give nomination of vessel in accordance to loading port rules in force at time and place of shipment.	115 116 117
Cargo to be loaded:	118
10.1 The lesser of: as fast as vessel can receive, or as fast as berth equipment can load. No time to count, however, if vessel gave Notice of Readiness in time and if not sufficient goods available to start loading on the 16th day as from 08:00 hours after vessel's nomination or when free berth becomes available, whichever later or if continuous loading of vessel has to be interrupted due to lack of cargo, Seller to pay detention as per the rate declared under Nomination Clause.	119 120 121 122
All extra berthing expenses due to cargo not being loadready to be for Seller's account.	123
10.2. At the following average rate which is to apply on the total cargo:	124
A) Seller undertakes to pump the oil into the vessel at a rate of minimum 80 metric tons (to be applied on this parcel) per running hour, always provided the vessel is in conditions to receive at this rate, otherwise demurrage as per Charter Party for his account, no despatch.	125 126 127
B) Time to count per running hour. Saturday afternoons, Sundays, and Federal and/or State and/or Municipal holidays excepted, unless used. On Mondays and on days after a holiday, time to start/restart counting at 08:00 hours (unless used). Seller shall not be responsible for any time lost due to act of God, strike, lockout, riots, civil commotion, labour stoppages at the port/s of loading or elsewhere preventing the forwarding of the goods to such port/s, breakdown of machinery and/or winches, power failure, fire or any other cause of "force majeure".	128 129 130 131 132
C) Notice of Readiness at loading port to be given until 17:00 hours during ordinary office hours or until 11:00 hours on Saturdays. Laytime to start counting whether in port or not, whether in berth or not, 6 hours after Notice of Readiness has been tendered. Vessel must be ready in all respects to receive cargo. If upon or after berthing vessel's tanks are found unsuitable by surveyors, any time lost due to cleaning not to count as laytime. Vessel/Buyer will present only one Notice of Readiness upon arrival at port, which is deemed to serve as sufficient load-notice to all shippers loading on that vessel. Choice of berth sequence will be vessel's/buyer's option, unless otherwise ordered by Port authorities. At second port of loading, if used, laytime to start counting at 08:00 hours on the next working day after vessel's arrival, whether in port or not, whether in berth or not. If loading berth is free and available, vessel is considered "arrived" when berthed fast alongside. When port is congested and/or berth unavailable, "arrival" is understood to be the moment the vessel drops anchor at the bar or normal anchorage. Shifting from roads to berth not to count as laytime. Whenever the vessel nominated is loaded by more than one seller per berth and/or more than one bulk commodity per berth and/or from more than one berth per port, the time attributed to each individual berth shall be prorated among all the Sellers/commodities loading at that berth. At second and/or further berths time shall count from docking or the next regular working period (from the time the vessel was for all intents and purposes ready to start loading at that berth), whichever earlier. Time shall finish upon completion of total loaded at any berth. Should however one or more shippers not have the goods ready for loading at the berth, then prorated counting of laytime to stop from the moment all goods are loaded by supplier/s who had goods ready, and time to count separately for the remaining parcel/s. Alternatively, if the vessel is not allowed to berth because one or more shippers do not have goods ready for loading, same shipper/s shall be first to load, and time for his/their account, up to the moment he/they have loaded all his/their goods, after which time to count prorated amongst shippers who had their goods ready for loading.	133 134 135 136 137 138 139 140 141 142 143 144 145 146 147 148 149 150 151 152 153
